Hot Mix Asphalt
R&G SDS Number: 001

SAFETY DATA SHEET

Section 1: Identification of product / manufacturer / utilization

Product form: Semi solid
Product name: ¾” medium asphalt, ¾” coarse asphalt, ¾” fine asphalt, ½” medium asphalt, ½” coarse asphalt, ½” fine asphalt, ½” super fine asphalt, 3/8” fine asphalt, ¼” fine asphalt, berm mix, sheet mix, tank mix, cold mix

Synonyms: Hot mix asphalt, Asphalt concrete, Bituminous asphalt

Manufacturer
Reed & Graham, Inc.
690 Sunol Street
San Jose, CA  95126   USA
(408) 287-1400

Emergency telephone number
CHEMTREC 1-800-424-9300

Section 2: Hazards identification

Classification of mixture:
- Acute Toxicity Oral – Category 3
- Skin Corrosion/Irritation – Category 1B
- Eye Damage/Irritation – Category 1
- Carcinogenicity – Category 1A

Signal word: Danger
**Hazard Statements:**

- **Eye contact:** Exposure to hot mix asphalt fumes may cause irritation, redness or pain. Direct contact with asphalt dust may cause irritation to eyes by abrasion.
- **Skin contact:** Direct skin contact with hot asphalt can cause serious and painful thermal burns.
- **Inhalation:** Inhalation of hot asphalt fumes can cause headache, nausea, respiratory tract irritation and nervousness due to the formation of hydrogen sulfide gas. Inhalation of hydrogen sulfide gas can cause upper respiratory tract irritation and if exposure is prolonged at levels greater than OSHA PEL or 20 ppm, pulmonary edema and even coma or death can result.
- **Ingestion:** Ingestion of hot asphalt produces a direct thermal burn to the mouth and throat.

**Precautionary Statements:**

- Obtain and read product data sheet for instructions of use
- Do not handle material until all the safety data sheet has been obtain, read and understood.
- Contact with hot material may cause thermal burns

**Prevention**

- Do not eat, drink or smoke when using this product
- Do not breathe dusts/fume/gas/mist/vapors/spray
- Wear protective gloves/protective clothing/eye protection/face protection
- Contaminated work clothing must not be allowed out of the workplace
- Obtain special instructions before use
- Do not handle until all safety precautions have been read and understood

**Response**

- If swallowed: Rinse mouth. DO NOT induce vomiting. Immediately call a poison center/doctor
- If on skin or hair: take off immediately all contaminated clothing. Rinse skin with water/shower.
- If inhaled: Remove person to fresh air and keep comfortable for breathing
- If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.
- Continue rinsing. Immediately call a poison center/doctor

---

**GHS pictogram**
Storage
- Store in an appropriate container or containment structure

Disposal
- Dispose of contents/container in accordance with local/regional/national regulations

### Section 3: Composition / Information on Ingredients

**Component Information/Information on Non-Hazardous Components**

**General Information**

Trace Elements: Hot Mix Asphalt is made from materials mined from the earth and is processed using energy provided by fuels. Trace amounts of naturally occurring, potentially harmful chemical might be detected during chemical analysis.

### Section 4: First Aid Measures

**EYE CONTACT FIRST AID:**

Burns due to contact with heated material require immediate medical attention. Hold eyelids apart and flush eyes with plenty of cold water for at least 15 minutes. Get medical attention if irritation develops or persists.

**SKIN CONTACT FIRST AID:**

For hot product, immediately immerse in or flush the affected area with large amounts of cold water to dissipate heat. For hot material exposure, DO NOT try to remove solidified material from the skin. DO NOT try to dissolve with solvents or thinners. Get medical attention immediately.

For exposure to cold material, wash skin with soap and water. Wear protective gloves to minimize skin contamination.
**INHALATION FIRST AID:**
At elevated temperatures may cause irritation of the eyes and respiratory tract. Although this product is not known to cause respiratory problems, if breathing is difficult, safely remove victim to fresh air and provide oxygen. Get immediate medical attention.

**INGESTION FIRST AID:**
Ingestion is not considered a potential route of exposure. If vomiting should occur spontaneously, keep airway clear. Contact a physician.

**STATEMENT OF PRACTICAL TREATMENT:**
Cool exposed area with water to dissipate heat. Get prompt medical attention. No attempt should be made to remove firmly adhering asphaltic material. Only medically approved solvents may be used to remove material from burns, as other solvents could cause further damage.

---

**Section 5: Fire Fighting Measures**

**FLAMMABLE PROPERTIES:**
Product contains heavy oil (asphalt), will not burn unless preheated.

**EXTINGUISHING MEDIA:**
Carbon dioxide, foam, or dry powder. Do not use water because of violent reaction with hot asphalt. Use water spray to cool fire exposed containers. Exercise care when using water as contact with hot asphalt products may produce steam and violent foaming.

**FIRE & EXPLOSION HAZARDS:**
Can release vapors that form explosive mixtures at temperatures at or above the flash point.

**FIRE FIGHTING INSTRUCTIONS:**
As in any fire, firefighters should wear self-contained breathing apparatus pressure-demand MSHA/NIOSH (approved or equivalent) and full protective gear. Decomposition may produce fumes, smoke, oxides of sulfur, carbon and hydrocarbons, and possible small quantities of hydrogen sulfide.

**COMBUSTION PRODUCTS:**
Avoid breathing vapors from heated material. Combustion may produce CO, NOx, SOx and reactive hydrocarbons.

---

**Section 6: Accidental Release Measures**

**Recovery and Neutralization**
Eliminate all sources of ignition or flammables that may come into contact with a spill of this material.
Materials and Methods for Clean-up
Personnel involved in cleanup processes should implement controls as identified in section 8 as appropriate. Keep all ignition sources at least 50 feet away. Avoid personal contact with heated material. Collect cold material and dispose waste in accordance with local, state and federal regulations.

Emergency Measures
Isolate area. Keep unnecessary personnel away.

Environmental Precautions
Prevent materials from entering streams, drainages or sewers. Spills entering surface waters or any other water courses or sewer entering/leading to surface waters that cause a sheen must be reported to the National response center 800-424-8802. None of the components are subject to the reporting requirement of Title III of SARA, 1986 and 40 CFR372.

Prevention of Secondary Hazards
None.

Section 7: Handling and Storage

Handling Procedures
When sampling containers use appropriate personal protective equipment such as gloves that are heat resistant, safety glasses, work boots and appropriate clothing. Do not enter storage area unless adequately ventilated. Avoid breathing vapors from heated material. Avoid contact with eyes, skin, and clothing. Breathing hydrogen sulfide must be avoided.

Storage Procedures
Store away from all ignition sources and open flames, in accordance with applicable laws and regulations. Storage containers should be ventilated to reduce fire and explosion hazard, and possible overexposure of personnel to fumes and vapors. Do not store near food and beverages or smoking materials.

Sections 8: Exposure Controls / Personal Protections

Component Exposure Limits
Quarts (14808-60-7)

ACGIH: 0.025mg/m3 TWA (respirable fraction)
NIOSH: 0.05 mg/m3 TWA (respirable dust)

Engineering measures
Use general ventilations methods to controls exposure within applicable limits

Personal Protective Equipment: Respiratory
Not required under normal use and working conditions. For air contamination which exceed or are likely to exceed applicable exposure limits, use a NIOSH/MSHA approved, contaminate specific air purifying respirator. Respirator and or filter cartridge selections should be based on American
National Standards Institute (ANSI) Z88.2 practices of Respiratory Protection.

**Personal Protective Equipment: Hands**
Hot resistant glove should be worn to protect hands

**Personal Protective Equipment: Eyes**
Safety glasses with side shields should be worn as minimum protections. Wear chemical goggles to prevent eye contact with materials

**Personal Protective Equipment: Skin and Body**
Normal work clothing long sleeved shirts and long pants is recommended.

---

### Section 10: Stability and Reactivity

**Reactivity**
Strong oxidizers may react with hydrocarbons. Adding water to hot asphalt presents an explosion hazard

**Chemical stability**
This is a stable product

**Conditions to avoid**
Keep away from ignition sources. Avoid extreme temperatures

**Hazardous decomposition products**
Carbon monoxide, nitrogen oxide, sulfur dioxide, hydrogen sulfide, and various hydrocarbons may be released by thermal decomposition. Hazardous vapors may collect in enclosed vessels or areas of not properly ventilated.

---

### Section 11: Toxicological Information

**Acute Toxicity**

**Component Analysis – LD50/LC50**
Quartz (14808-60-7)
Oral LD50 Rat 500 mg/kg

**Potential Health Effects: Skin Corrosion Property / Stimulativeness**
Heated material can cause severe thermal burns. Emissions may cause mild irritation. There may be an increased sensitivity to sunburn with the skin is exposed to asphalt fumes.

**Potential Health Effects: Eye Critical Damage / Stimulativeness**
Heated material can cause severe thermal burns. Asphalt fumes may cause eye irritation. Exposure to hydrogen sulfide at concentration above 4 ppm may cause eye irritation.

**Potential Health Effects: Ingestion**
Direct contact with heated material can produce thermal burns on contacted tissues. Gastric masses and stomach obstructions have been reported in individuals who have chewed and swallowed asphalt.
Potential Health Effects: Inhalation
Emissions from heated petroleum asphalt may have an unpleasant odor, and may product nausea and irritation of the upper respiratory tract. Naptha component vapors hot asphalt at high concentrations in the enclosed spaces may cause symptom of euphoria, respiratory irritation and edema, headaches, dizziness, drowsiness, concussions, coma cyanosis and general depression. Hydrogen sulfide causes respiratory irritation at concentrations of 4 to 100ppm. At low concentration H2S has a rotten egg odor. At elevated concentrations H2S acts as a systemic poison, causing unconsciousness and death by respiratory paralysis. Chronic inhalation of petroleum asphalt emissions may contribute to respiratory irritation. If hardened asphalt concrete is subjected to mechanical forces which generate dust particles, exposure to crystalline silica dust is possible.

Respiratory Organs Sensitizations/ Skin Sensitization
Chronic exposure to petroleum asphalt has caused skin disorders such as dermatitis, folliculitis, or oil acne.

Generative Cell Mutagenicity
This product is not reported to have any mutagenic effects.

Carcinogenicity
May cause cancer

Petroleum asphalt and the asphalt additives, in this product are not listed as a carcinogen by NTP, OSHA or IARC. Crystalline silica, a component of these products, is listed by IRAC but not by OSHA. IRAC has determined that there is sufficient evidence for carcinogenicity to experimental animals exposed to crystalline silica and limited evidence for carcinogenicity to humans. Limited evidence means that a causal relationships is possible, however, other explanations such as chance, bias or confounding factored cannot adequately be excluded. NTP has listed crystalline silica as reasonably anticipated to be a human carcinogen.

Component Carcinogenicity
Quartz (14808-60-7)
ACGIH: A2 – suspected human carcinogen
NIOSH: Potential occupational carcinogen
NTP: Known Human Carcinogen
IARC: Monograph 100C (2012) listed under crystalline silica inhaled in the for of quartz or cristobalite form occupational sources; Monograph 68(1997) Group 1 (Carcinogenic to humans)

Reproductive Toxicity
This product may contain components which may cause adverse reproduction and/or development effects.

Specified Target Organ General Toxicity: Single Exposure
Acute overexposure to this material or its components may cause systemic toxicity, including adverse effects to the following: liver, kidney, lung, skin, spleen, thymus, blood elements, lymph nodes, testes, bone morrow, and nervous system.
Specified Target Organ General Toxicity: Repeated Exposure
Chronic overexposure to this material or its components may cause systemic toxicity, including adverse effects to the following: liver, kidney, lung skink, spleen, thymus, blood elements, lymph nodes, testes, bone marrow, and nervous system.

Aspiration Respiratory Organs Hazard
This product is not reported to have any aspiration hazard effects

Other toxicological Information
Exposure to components of this material may cause the following specific symptoms, depending on the concentration and duration of exposure: anemia, pallor, fatigue, loss of appetite, anxiety and melanescia. Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intention misuse by deliberately inhaling vapors may be harmful or fatal.

Section 12: Ecological Information

General Product Information
Harmful to aquatic life with long lasting effects. This material may be toxic to fish and other aquatic live and may impede growth of vegetation.

Component Analysis - Eco toxicity Aquatic Toxicity
No Eco toxicity data are available for this product’s components.

Persistence/Degradability
No information available for the product

Bioaccumulation
No information available for the product

Mobility in Soil
No information available for the product

Section 13: Disposal Consideration

Waste Disposal Instructions
See Section 7 for Handling Procedures. See Section 8 for Personal Protective Equipment recommendations

Disposal of Contaminated Containers or Packaging
Dispose of contents/container in accordance with local/regional/national/international regulations.

Section 14: Transport Information

DOT Information
Shipping Name: Hot mix asphalt
Additional info: If the shipping temperature of a solid equals or exceeds 464F, DOT regulations
classify the solid as an “Elevated Temperature Material”, and a “hot” label is required. Transport in accordance with local regulations, where applicable. Consult 49CFR 172.101 for shipping information.

**Section 15: Regulatory Information**

**US Federal Regulation**
**Component Analysis**
None of this product's components are listed under SARA Section 302 (40 CFR 355 appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 302.4).

**State Regulations**
**Component Analysis**
The following components appear on or more of the following state hazardous substances
Quartz CAS 14808-60-7 California (no)

The following statements are provided under the California Safe Drinking Water and Toxic Enforcements Act of 1986 (Proposition 65)

**WARNING!** This product contains chemicals known to the state of California to cause cancer, birth defects, or other reproductive harm.

**Section 16: Other Information**
